SKILLS SUMMARY

- **Languages & Back-end:** SAP ABAP, .NET 8 (C# 12), Python, SQL
- **AI & Autonomous Agents:** MCP Protocol, LLM Integration (Devin, Claude, Cursor)
- **SAP Ecosystem:** S/4HANA, SAP ECC, SAP NCo 3.1, ADT REST, abapGit
- **DevOps & QA:** Azure DevOps, CI/CD pipelines, Docker, Robot Framework, Playwright

PROFESSIONAL EXPERIENCE

Sovos Compliance (Jun 2021 – Present)

SAP Software Developer II

- **Product Development:** Refactoring and development of custom SAP products (ECC and S/4HANA) focused on global Tax Compliance, leading the technical adaptation of legacy systems to the upcoming Brazilian Tax Reform (IBS/CBS).
- **AI Engineering (Innovation):** Architected and developed a proprietary MCP Server from scratch in .NET 8. The solution created an autonomous bridge between AI agents and SAP (compatible from Basis 7.00 to S/4HANA Cloud), exposing repository reading tools and significantly accelerating technical analysis and documentation by senior developers.
- **Performance & Architecture:** Created high-performance internal ABAP tools for extraction, massive processing, and analysis of complex tax payloads (XML/JSON), severely reducing troubleshooting time.
- **Mentorship:** Created technical documentation for E2E pipelines and provided cross-team support for resolving critical incidents.

Senior QA Engineer (SDET)

- **Automation Architecture:** Technical leadership in designing and implementing a CI/CD regression test automation pipeline for SAP ECC, integrating Robot Framework, Python, and Azure Pipelines.
- **DevOps & Tooling:** Developed C#/.NET tools for release management via SOAP Web Services and configured the ABAP versioning strategy using abapGit.
- **Test Innovation (API Mocking):** Developed a FastAPI (Python) service distributed as a standalone executable, simulating end-to-end tax compliance flows to enable fast integration testing by SAP teams without external system dependencies.
- **Containerization:** Led Proof of Concepts (PoCs) for Docker migration, optimizing images and managing calculation engine dependencies in Linux environments.

Quod

Systems Analyst / QA (Oct 2019 – Apr 2021)

- Developed structured Python scripts for process automation and API testing (Postman), integrating them directly into continuous delivery pipelines (GitLab CI/CD).

Sovos Compliance

Support Analyst II (Oct 2015 – Sep 2019)

- Provided advanced support and troubleshooting for LATAM clients regarding electronic invoicing processes, conducting data analysis and system maintenance directly in relational databases (SQL Server, Oracle).

Roldão

IT Assistant (Sep 2014 – Sep 2015)

- Supported the corporate IT infrastructure, maintained retail automation systems (POS), and performed basic Linux server administration.

EDUCATION

- **Postgraduate Degree in Software Engineering** – Universidade Estácio (Jul 2023 - Jul 2024)
- **Bachelor's Degree in Computer Science** – Universidade Anhembi Morumbi (Jun 2019 - Aug 2023)

LANGUAGES

- **English:** Professional Working Proficiency (Used daily in meetings and operations with a global team).
